

Instructional Model B: Full Virtual Learning by Semester - Family Choice

Pro:

- All MS teachers in support
- Eliminates fear of coming to school for those who feel that way or have medical needs
- Can help with family childcare planning
- If you need to be more social distanced as family/child, much more ability to do so in this model
- Fewer kids to service face to face could allow for more distancing for those in face to face model
- Don't want to have to worry/plan as a family about illness, etc about childcare and other issues that could arise from unplanned need for kids at home
- Building out a curriculum so if have to go online, would have backbone to start

Con:

- Feasibility follow ups needed/whose responsibility
- Can be difficult to implement
- Coordination from all schools participating, hard to coordinate report cards, etc back to home school
- Loss of control for our district over curriculum, grading, general flow, especially in MS
- Out of sequence curriculum for kids when they return to Swallow
- Length of commitment, weight of commitment
